

Ex. No. 1	HTML Fundamentals and Basic HTML Elements
Date of Exercise	17 / 07 / 2026
GitHub Host Link	https://abin-shaji-thomas.github.io/Web-Technology-Lab/Experiment-1/1st-Excercise.html

Aim

To design and develop a simple HTML webpage using basic HTML5 elements, attributes, hyperlinks, images, lists, formatting tags, colors, and inline CSS to understand the fundamentals of web page creation.

Description

HTML (HyperText Markup Language) is the standard markup language used for creating web pages. It provides the basic structure of a webpage using elements such as headings, paragraphs, images, hyperlinks, lists, and formatting tags. HTML also supports attributes that provide additional information to elements and allows inline CSS styling to improve the appearance of webpages.

In this experiment, an Infosys Employee Training Portal webpage is developed using HTML5 concepts such as document structure, images, hyperlinks, lists, attributes, formatting elements, colors, and inline CSS. The webpage demonstrates how HTML elements work together to create an informative and visually appealing webpage.

Procedure:

Procedure

1. Open Visual Studio Code.
2. Create a new folder named **Experiment-1**.
3. Create a new HTML file named **1st-Excercise.html**.
4. Write the basic HTML5 document structure.
5. Set the document language using the `lang` attribute.
6. Add the webpage title as **Infosys Employee Training Portal**.
7. Insert the Infosys logo using the `<img>` element with appropriate attributes.
8. Create different sections using headings and paragraphs.
9. Add the Digital Skills Development Program section with an image.
10. Create an unordered list for available training courses.

11. Add hyperlinks for the Infosys website and careers page using the `<a>` tag.
12. Apply inline CSS using the `style` attribute for colors, fonts, borders, spacing, rounded corners, alignment, and shadows.
13. Add a footer displaying the copyright message.
14. Save the file.
15. Open the webpage using Live Server or any web browser.
16. Verify the output and capture the screenshot.

Program

```
<!DOCTYPE html>
<html lang="en">

<head>
  <meta charset="UTF-8">
  <title>Infosys Employee Training Portal</title>
</head>

<body style="background-color:#f4f6f9; font-family:Arial, sans-serif; margin:0; padding:0;">

  <!-- Container -->
  <div style="width:900px; margin:20px auto;">

    <!-- Header -->
    <div style="background-color:#0057a8; color:white; display:flex; align-items:center; padding:18px;
border-radius:5px;">
      <div style="background-color:white; padding:10px; border-radius:5px; margin-right:20px;
width:130px;">
        
      </div>
      <div>
        <h1 style="margin:0; font-size:30px;">Infosys Employee Training Portal</h1>
        <p style="margin:6px 0 0 0; font-size:16px;">Learn, improve and build skills for the digital
future.</p>
      </div>
    </div>

  </div>
```

```

Output:

Infosys Employee Training Portal

Learn, improve and build skills for the digital future.

Digital Skills Development Program

Infosys provides technical training programs to help employees develop skills in artificial intelligence, cloud computing, cybersecurity, data science and software development.

Available Training Courses

-  Artificial Intelligence and Machine Learning
-  Cloud Computing
-  Cybersecurity
-  Full-Stack Web Development
-  Data Science

Explore Infosys

Visit the official Infosys website to learn more about the company and its services.

© 2026 Infosys Training Portal — HTML Practice Program

Result

Thus, the Infosys Employee Training Portal webpage was successfully developed using HTML5 basic elements, attributes, hyperlinks, images, lists, formatting tags, and inline CSS styling. The webpage demonstrates the fundamental concepts of HTML required for designing structured and visually appealing web pages.
